

FORM OF AUCTION PROCESS & BAS BACK UP MEMORANDUM

To: Primary Dealers

Cc: Bloomberg

Re: Procedure for Iceland Treasury Notes Auctions

The purpose of this memorandum is to describe the procedures to be applied in Icelandic Treasury Note auctions arranged by the Central Bank of Iceland.

Furthermore, the Annex 1 to this memorandum provides a back-up procedure to be used if a technical problem occurs with the Bloomberg Auction System ("BAS").

1. General; auction information, size, criteria of bids/offers

- 1.1 The Central Bank of Iceland follows the auction plan for Treasury Notes.
The Central Bank of Iceland can cancel auctions at any time.
- 1.2 The Central Bank of Iceland identifies the Treasury Notes and the maximum amount to be auctioned.
- 1.3 The information of forthcoming auction will be displayed on Bloomberg page ICTS and details will be sent to enable bidders by BAS Invitation message. Other information providers may also be used, as agreed between the Central Bank of Iceland and such providers.
- 1.4 Bids/offers shall be expressed on a price basis, with an accuracy of three decimals (the last one being 0 or 5). The price base shall be the same as is currently used in the SAXESS trade system, that is prices are in multiple of 100.

2. Electronic Auction Process

The normal auction procedure using the Bloomberg Auction System ("BAS") will be as follows:

- 2.1 The auction will be opened for bids/offers at **13.00** Icelandic time.
- 2.2 Each Bidder is asked to test their BAS workstation and the system before **13.30** Icelandic time by sending a TEST BID to the Central Bank of Iceland to see if any technical or other problems are being experienced. This bid can be deleted or changed before the closing time of the auction. If it is not deleted or changed it will be regarded as a binding bid/offer for the auction.

- 2.3 The Auction closing time announced on Bloomberg page ICTS is **14.00** Icelandic time. Bidders must input bids/offers using BAS to the Central Bank of Iceland before **14.00** Icelandic time. The BAS will not process bids/offers after the system closing time.
- 2.4 The Central Bank of Iceland will publish the auction results on as soon as possible normally on, or after, **14.45** Icelandic time on Bloomberg page ICTS.

3. Amendments and modifications

This process description for auctions may be changed at any time by the Central Bank of Iceland. Central Bank of Iceland will consult with market participants to seek as wide an acceptance as possible to the proposed changes.

Central Bank of Iceland.

Annex 1

Back-up procedure for BAS

ANNEX 1

Back up procedure for electronic auction via a Bloomberg Auction System (“BAS”)

If the Central Bank of Iceland determines any problems during a Treasury Notes auction, it will revert to one of the following back-up plans as described below in clause 1.1 and 1.2.

The Central Bank of Iceland must be informed by phone (number: +354 569 9633) **immediately** of any technical or other problems being experienced by a PD, whether in a Bidders Bloomberg workstation or other systems.

1.1 Problem – Limited scale

- a) Limited number of Bidders experience a technical problem making it impossible to submit their bids/offers electronically using the BAS system, and;
- b) The Central Bank of Iceland determines there may be a technical problem causing a problem/delay but it is still possible to continue processing the auction in BAS regarding other bidders. The Central Bank of Iceland decides to accept bids by e-mail or fax from affected Bidders.
- c) Affected Bidders give their bids to the Central Bank of Iceland by e-mail or fax at **13:50** at the latest (fax number +354 569 9604), to be confirmed by phone immediately (phone number:+354 569 9633).
- d) The Central Bank of Iceland will inform Bloomberg contact of the problem.
- e) Bloomberg undertakes to have adequate personnel stand by during the auction process.
- f) The Central Bank of Iceland will confirm the receipt of the bids/offers directly to the Bidder in question and inputs the bids on his behalf in the BAS.

1.2 **Problem - Large scale**

If several Bidders experience a technical problem making it impossible to submit their bids/offers electronically using the BAS system, or

the Central Bank of Iceland is unable to receive bids/offers using BAS or analyse and/or calculate the results of the auction, or

there is any other problem which in the Central Bank of Iceland view makes it impracticable to continue processing the auction with BAS.

then:

- a) The Central Bank of Iceland will inform Bidders and Bloomberg as soon as possible by telephone after a decision has been made not to continue using the BAS for the auction in question.
- b) The manual auction process will be used instead of the BAS electronic system, as described in sub-clauses c to f below.
- c) Bidders give their bids by e-mail or fax (fax number: + 354 569 9604) signed by authorised person(s) to the Central Bank of Iceland before **14.05** Icelandic time.
- d) Bidders must confirm their bids/offers by a phone before **14.10** Icelandic time (phone number: +354 569 9633).
- e) The Central Bank of Iceland will publish the auction results on OMX Nordic Exchange. After the information has been published on OMX Nordic Exchange the Bidders will be informed whether their bids have been accepted and the total amount of bids accepted.
- f) The Central Bank of Iceland has the right to define another time table than set out above, if particular circumstances so require. Bidders will be informed immediately of such adjusted timetable by telephone.
